Make your own...

SENTINEL

This is 3D Fan art and is in no way affiliated with the characters or the company that owns them. They are created in honour of the characters and for no commercial/financial gain, and as such can't be distributed for any financial gain either please.

I'll apologise in advance. This model is more complicated than some of my others and will use up a LOT more paper. Each part of the body is labelled here and then has it's own section of pieces so you can build each module before putting him together. Hope you have fun building!!
